

Product Datasheet

On-metal Tags - UHF

The BrightCard On-metal Tags - UHF come in a very robust ABS housing and have been designed for on-metal applications. They have a 3M durable adhesive layer with release paper on the backside of the tag, making it easy to attach to hard surfaces.

The tags are available with frequencies of 868 and 915MHz.

Applications:

- Supply chain
- Electronic identification
- Parking
- Industrial

Product specifications:

Dimensions:	150 x 25 x 5mm
Compliant :	ISO18000-6
Available frequencies :	868MHz 915MHz
Material:	ABS
Colors:	Black / Grey
Surface:	Opaque
Application temp.:	-20°C to 75°C

Available 868 - 915MHz systems:

IC Type	ISO	Memory	Antenna	Order No.
NXP UCode HSL	18000 – 6b	2048 bit	Etched aluminium	HT-OM-UCODEHSL
NXP UCode EPC Gen2	18000 – 6c	512 bit	Etched aluminium	HT-OM-UCODEEPC
